

CHEVRON RENAISSANCE MIXED-USE

a local landmark reborn

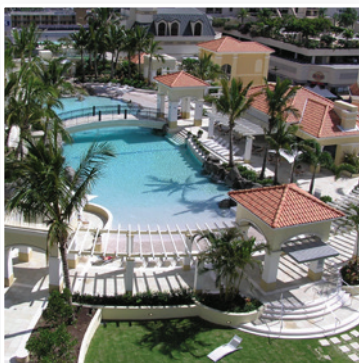

This new mixed-use complex designed with a resort style mindset creates a new gathering place and landmark on the five acre site of a former hotel.

It includes 130,000 square feet of retail and restaurants in a convivial pedestrian seaside streetscape with multiple plazas and three, forty-story condominium towers on a podium recreation deck set back from the new "village" below. A supermarket and parking garage are located in the basement.
