

CLUB MED SANYA RESORT

a majestic greeting

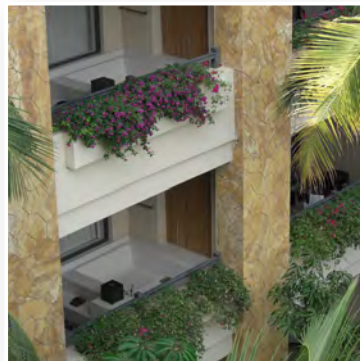

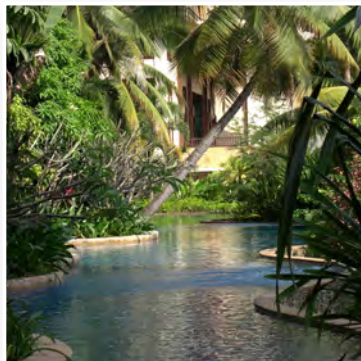

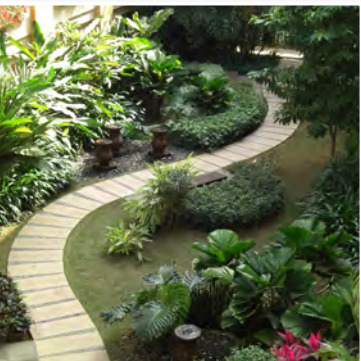

Already from afar you are greeted by the spa suites' tall pitched grass roofs reaching for the sky. These structures allow the hot air to rise and make the room below cool and airy: An alluring picture of what comfort the guest will be invited to.

By stepping and grouping the 450 guestrooms like little villages around the resort the architecture draws a connection to the distant hills and creates individual spaces that merge again through the tropical landscape and the tentacles of the lagoon-like pool.
