

HILTON HANGZHOU QIANDAO LAKE RESORT

from across the water a beacon shines

Rising from the shores of this tranquil lake surrounded by mountains blanketed with verdant forest, the resort carefully steps up the slope and along the natural contours allowing reduction in mass appearance to respectively embrace the environment. Coupling this with the inspiration from Chinese garden pavilions and mountain resorts worldwide, the end affect is of a more intimate luxury boutique setting not necessarily associated with a 350 key hotel. Panoramic lake views from within are abundant including the lobby's grand gable window reaches out to the lake as does one guest tower reminiscent of a lighthouse housing the Presidential Suite.
