

MARITIM TAI HU BAY RESORT

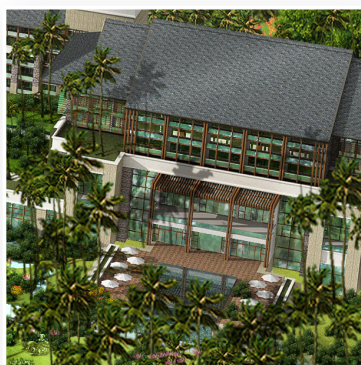

lakes, mountains and a ha ha!

Overlooking Lake Tai Hu with the green hills behind is this new five-star hotel with 300 guestrooms. The site is compact and close to a road so the hotel is raised up giving ninety percent of guest rooms and the restaurants lake views. A landscape berm is also created to absorb traffic noise and visually hide the road from the hotel, a device known as a 'Ha Ha' and invented by the famous landscape architect Capability Brown.

The architectural style employs local materials in a contemporary style.
