

RENAISSANCE TONG AN RESORT

Taking flight

Inspired by the wings of the local sea birds the concept is a resort where a surprise happens around every corner. The guests can swim through the building to the restaurants and other public amenities. An 'event stair' connects public areas over several levels and becomes a journey through the hotel. With one hundred and eighty-eight guest-rooms and twelve hotel villas, most with ocean views, other amenities include a spa, Kids club and health club, meeting rooms, restaurants, pool bar, indoor swimming pool, outdoor pools and gardens with beach access. The wing inspired roof over the main lobby will be a grand hall having direct ocean views.
